iRoya Equity Offer Summary

29 October 2026 | Proposed commercial terms

NGN 2,410,000 for 10% equity

Funding one year of deployment staffing and operations

iRoya provides independent hotels with booking inventory and day to day operating tools. This proposed investment funds a controlled launch using the existing software and founder technical oversight.

Use of funds	Calculation	Annual NGN
Two staff members	2 × 25,000 × 12	600,000
Production hosting	USD 45 × 12 × NGN 1,500	810,000
Additional operations	Annual allocation	1,000,000
Total investment	Twelve month plan	2,410,000

Equity calculation

Term	Proposed value
Investor ownership after investment	10% fully diluted
Existing holders combined	90% after this investment
Implied post investment value	NGN 24,100,000
Implied pre investment value	NGN 21,690,000

Deployment assumptions

Hosting assumes Vercel Pro at USD 20 per month for one deploying account and Supabase Pro from USD 25 per month for one project. NGN 1,500 per USD is a budgeting assumption. Taxes overages extra paid seats and external setup labour are not separately priced. Domain email and routine support allowances sit inside the NGN 1,000,000 operations allocation.

Proposed closing basis

New capital is paid into the business for newly issued shares. Final ownership records software rights investor rights and approvals must be agreed in definitive documents. The offer is a proposed negotiation basis rather than an independently verified valuation. There is no guaranteed financial return.

Pricing references checked 28 October 2026: Vercel Pro and Supabase Pro. See the full proposal for cost assumptions launch milestones and revenue illustrations.
